ACHHE KAVYA

Warangal | +91-8106931983 | kavyaachhe@gmail.com

Career Objective

Aspiring Data Science fresher with hands-on experience in SQL, Python, and machine learning projects. Skilled in data cleaning, analysis, and extracting actionable insights from structured datasets. Seeking an opportunity to apply data-driven problem-solving skills in a real-world environment.

Skills

Data Analysis & Tools

- SQL (Joins, Aggregations, Subqueries)
- Excel (Pivot Tables, VLOOKUP)
- Power BI (Dashboards & Data Visualization)

Programming

- Python (Pandas, NumPy, basic data analysis)
- Core Java (OOP concepts)

Machine Learning (Basic Exposure)

- Classification models (Logistic Regression, basic understanding of Tree-based models)
- Model evaluation (Accuracy, Confusion Matrix, basic metrics)
- Data preprocessing and feature handling

Tools & Others

- Git, JIRA (Basics), MS Office

Education

- B.Tech in Computer Science-Vaagdevi College of Engineering | GPA: 7.9 | 2025
- Class XII – SR Junior College for Girls | GPA: 9.0 | 2021
- Class X – Sharada High School | GPA: 9.2 | 2019

Internships

Software Development Intern – Skill Nation (Jan 2024 – Mar 2024)

- Wrote SQL queries to extract and analyze structured data.

- Built Power BI dashboards to visualize trends and patterns in datasets.
- Assisted in analyzing business requirements and translating them into data insights.
- Worked with real-world datasets to support reporting and decision-making.

Technologies: SQL, Power BI

Machine Learning Intern – E-Cell IIT (Jun 2023 – Jul 2023)

- Collected, cleaned, and preprocessed health-related datasets using Python (Pandas).
- Built and tested basic machine learning models for classification tasks.
- Evaluated model performance using standard metrics.
- Documented findings and presented insights.

Technologies: Python, Pandas, Scikit-learn

Projects

Thyroid Disease Classification

- Analyzed patient health dataset and performed data preprocessing using Pandas.
- Implemented classification models (e.g., Logistic Regression) to predict disease presence.
- Evaluated model performance using accuracy and confusion matrix.
- Derived insights from data patterns and presented results.

Tools: Python, Pandas, Scikit-learn

Student Management System

- Designed and implemented CRUD operations for managing student data.
- Structured workflows and handled data storage using file handling.
- Applied OOP concepts for modular design.

Tools: Core Java

Certifications

- SQL & Database Management
- Power BI for Data Visualization
- Business Analysis Fundamentals
- Python Programming Basics
